Previous Meeting :

- Roles Asignation : Tasin will work on the Android application + help for create the website.

Discussion Items :

	Action Items	Decision(s)
1.	Android application / Website	Jasmin found that it will be easier to work with SQL Lite database with Android. We have decided to use SQL Lite as database for the application and the website.
2.	Database (design)	We made a first draft for the database's content and we have to verify if there is no problem with the use of SQL Lite and the website development tools / frameworks.
3.	Analysis / UML	The analysis must be done in order to know which content we will add to our website in order to create the database.
4.	Android application design	A first brainstorming was made about the application design, but we have to work on it.

To do for the next week :

Actions to do	Description	Person(s) in charge
Application design	Make a first draft of the application (welcome page, links between pages with next, previous buttons etc).	Tasin
UML / Analysis	An analysis must be made in order to determine which content we'll be needed and then used in order to create the databse.	Edwin / Yannick
Use of SQL Lite	Determine if the combination between SQL Lite and the website development tools can be made.	Rodolf
Interaction Android / SQL Lite	Verify if the application, website and the database can work all together.	Rodolf, Jasmin
