Group Project Meeting

MINUTES   **01/02/2011   15H30→16H30**   **ROOM 5 (LIBRARY)**

Participants : Present – P / Absent – A / Absent without notification - X

P	Yannick Montesi (Project Leader, Chairperson, Minute Taker)
P	Jasmin Terrien
P	Edwin Chicouard
P	Rodolf Rick
X	Tasin Zarkoob

Previous meeting :

NOTHING

Discussion Items :

	Action Items	Decision(s)
1.	Roles Assignation	- Rodolf will work on the website plus a part of the design integration - Jasmin will work on the Android application plus a part of the design integration - Edwin will work on the website analysis and database plus UML - Yannick will help for the Android application (researches and programming) and make project documents - Tasin NOT DEFINED YET (Android ?)
2.	Website specificities	The technologies for create the website will be PHP and a Framework (not find yet) and the storage will be executed by a MySQL database coupled with an ORM (Doctrine but need to confirm). Some complementary researches about these technologies must be done.
3.	Android application	Some researches must be done about the connection between the application and the website, and about an offline storage on the mobile phone.
4.	Project boundaries / use of the website	This project have a social aspect : the website content will be presented as a "Wikipedia" : users will be allow to add a new place into the website if this place doesn't exist, and if the place already exists, users will be just allowed to modify the existing place (as the Wikipedia system). All additions or modifications will be moderate by an administrator.
5.	Project analysis / UML	An UML analysis must be done in order to design class diagrams
6.	Future features	Possibility to users to use their mobile GPS and check some interesting places around their location: restaurants, pub, etc. All these places will be suggested by the website.

To do for the next meeting :

Actions to do	Description	Person(s) in charge
Website technologies researches	Search which Framework and ORM will be used	Rodolf
Application researches	Search how connect the application to the website, and how store information on the an Android mobile phone	Jasmin
Project analysis	Start a UML analysis of the project	Edwin, Yannick

Next meeting :

Tuesday, February 8th 2011
